The Brazilian litigation and arbitration, tax, private client and M&A boutique **BVZ Advogados** is maintaining its year-to-year revenue growth over 10% in 2022, following an already unprecedented performance in 2021.

Amongst its practice areas, the 15 bill-earners law firm has reached the amount of R\$ 1.8 billion in litigation and arbitration matters under dispute.

The name-partner Ivo Bari sees the BVZ current results as “outstanding”, despite the 2022 “challenging year” for Brazil, due to the world economic downturn, high inflation, high interests, elections and world-cup.

According to Bari, one of the main reasons for the firm's results arises from the partner's hands-on approach in all matters.
