A group of 9 female lawyers of the firm **Candido Martins Advogados** has created the Women's Committee. The project completed one year of existence on March 8, the date on which International Women's Day is celebrated.

Tatiana Del Giudice Cappa Chiaradia (pictured right), the partner who leads the project, says the proposal of the Women's Committee is to discuss issues related to career development, behavior and other important themes of the female universe, going beyond the issues involving the daily routine of legal counseling.
