Estudio Echecopar, associated with Baker & McKenzie International, has assisted Agrovision in a \$210 USD million financing.

The financing consisted of a \$180 million USD secured syndicated loan and a \$30 million USD unsecured syndicated loan.

As a result of this transaction, Agrovision was able to increase the financing by an additional \$150 million USD and \$40 million USD, respectively, which will allow it to use the proceeds to fund its growth plan and refinance existing debt.

Agrovision Peru, part of the US-based Agrovision Corp, is a berry producer and exporter with operations in Peru, Mexico and Morocco.

Echecopar's team included associates **Katherine Zapata** (pictured left) and **Luciana Palomino** (pictured right).
