Category: [News](#)

The Guatemala office of García & Bodán advised IC Power in the acquisition of the holding company which controls two Guatemalan utility companies: Distribuidora de Electricidad de Oriente and Distribuidora de Electricidad de Occidente

The deal, valued at approximately \$500 million, gives Israel-headquartered IC Power majority shareholder control over two utilities which account for over 70% of the distribution of electricity in Guatemala.

Partners Jorge Asensio and Ignacio Andrade led the García & Bodán team advising IC Power.
